

## Video – VGA Converter Display video on LCD monitors

### USPs:

- No software required
- Stable and sharp image
- High resolutions

### General information:

This converter converts video signals from TV, DVD, game console or any other video device to VGA. The converter is able to display a sharp and stable image on a monitor in 800x600, 1024x768, 1280x1024, 1440x900 and 1680x1050 resolutions. Ideal to play for example Xbox 360® and PS3® games on a LCD monitor instead of your TV. No software required and very easy to connect.
